D.C. Core Services Agency Agency

Mental Health Rehabilitation Services for Children and Youth

About PSI

Founded in 1979 by two psychologists, PSI takes its name from the Greek letter psi, the symbol for Psychology. PSI is a licensed foster care/adoption agency in addition to a certified core services agency. Our foster care and mental health staffs are committed to home- and community-based social and mental health services for children and youth. We have, for over 38 years, worked closely with biological and foster families in planning and treating at-risk youth. The PSI mission is Helping People Grow.®

The PSI Philosophy

PSI's cognitive behavioral models of care stress developing each child's strengths, and in developing their parents' capacity to cope with the stressors in our lives. All of our services are person-centered. Through our continuum of care from residential foster care to out-patient mental health services the PSI mission is to help children and youth fulfill their personal aspirations.

PSI is a licensed specialized foster care and adoption agency, a certified Mental Health Rehabilitation Services Core Service Agency, DDS HBCS waiver provider, certified DC Medicaid Provider and certified adult day health program provider for seniors.
